Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This communication is responsive to the filing of an RCE on May 6, 2005.

Applicant's amendments and remarks have been carefully considered; however, they are deemed moot in view of the new ground of rejection set forth below.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 15 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Note that the specific sequence of the method steps as recited in claim 15 is not found in the originally filed disclosure.

3. Claims 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thomas (US 827,829) in view of Mahrle (US 2,821,146).

Thomas shows a type of material handling systems having horizontally-oriented I-beam 8 defining an exposed track for supporting a trolley. It is noted that the structure of Thomas does not have another rail connected thereto by mounting means as recited in the instant claims.

Mahrle discloses a material handling system similar to that recited in the instant claims, including I-beam 12, rail P, and element 20 readable as a hanger that connects

Art Unit: 3617

beam 12 to rail P such that certain portions of the beam and of the rail have the same vertical height.

In view of Mahrle, it would have been obvious to one skilled in the art to provide additional attachments, such as necessary mounting brackets and additional rails, to the existing material handling structure of Thomas, in a manner similar to that taught by Mahrle, so as to enable the accommodation of an automatic controlled carrier, such as that of Mahrle, for achieving all the advantages expected from the system of Mahrle.

Regarding the instant claimed trolley recited in instant claim 10, consider trolley 62 of Mahrle.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark T. Le whose telephone number is 571-272-6682. The examiner can normally be reached on Mon-Fri (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Samuel Morano can be reached on 571-272-6684. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
